SUMMARY

Proactive Computer Science student at GLA University, currently in the pre-final year, with a solid foundation in software development and programming. Skilled in Java, Python, and C through academic projects and internships. Enthusiastic about applying technical knowledge to real-world problems

EDUCATION

Bachelor of Technology (B-Tech) in computer science and Engineering

GLA University,  Mathura

08/2022 - 06/2026

EXPERIENCE

Full Stack web development

Coding Blocks

06/2004-08/2024

- A music taste explorer app helps users discover new music based on their preferences, creating personalized playlists and recommendations.
- HTML, CSS, JavaScript Node.js, Express.js for APIs, MongoDB for user data, and third-party APIs like Spotify for music streaming.
- The app will enhance user music discovery, offer personalized experiences, and promote new artists while integrating popular music streaming services.

Zidio Development

02/2024-03/2024

- Learn frontend development (HTML, CSS, JavaScript) for responsive design and backend (SQL) for managing location data efficiently.
- Create a user-friendly map interface using HTML, CSS, and JavaScript for location tracking, and store data in an optimized SQL database t
- Manage databases and optimized query for efficient data retrieval and manipulating using SQL

PROJECTS

1. Shopping Website

- This project aims to provide users with an easy-to-navigate platform for browsing and purchasing home appliances.
- Implemented using React for a responsive frontend, Node.js for the backend, and MongoDB for data storage, with separate admin and user functionalities.
- This website allows users to find relevant products quickly, while admins can manage the product listings and user data, improving the overall shopping experience.

2. Discussion Forum

- The forum was created to offer a platform where users can share ideas, ask questions, and engage in discussions on various topics.
- Developed using Django for the backend, React.js for the frontend, and MongoDB for managing user-generated content and discussions.
- The project fosters a sense of community, enabling users to connect, share knowledge, and engage in meaningful conversations across devices.

TECHNICAL SKILLS

Java, C, Python, Java, DSA, JavaScript, HTML, CSS, MERN
MySQL, MongoDB, Git, GitHub

PROFESSIONAL SKILLS

Conversational, Leadership, Problem solving,
Time management, Teamwork
